

More Detailed AvgAPCC Results for Prioritization of Abstract Test Cases by Weighting Covered Value Combinations

This document provides more detailed AvgAPCC results for the paper “Prioritization of Abstract Test Cases by Weighting Covered Value Combinations” submitted to Science China Information Sciences.

This document provides six figures of AvgAPCC comparisons for prioritization strength and a table of statistical analysis for pairwise AvgAPCC comparisons of all WICBP Techniques.

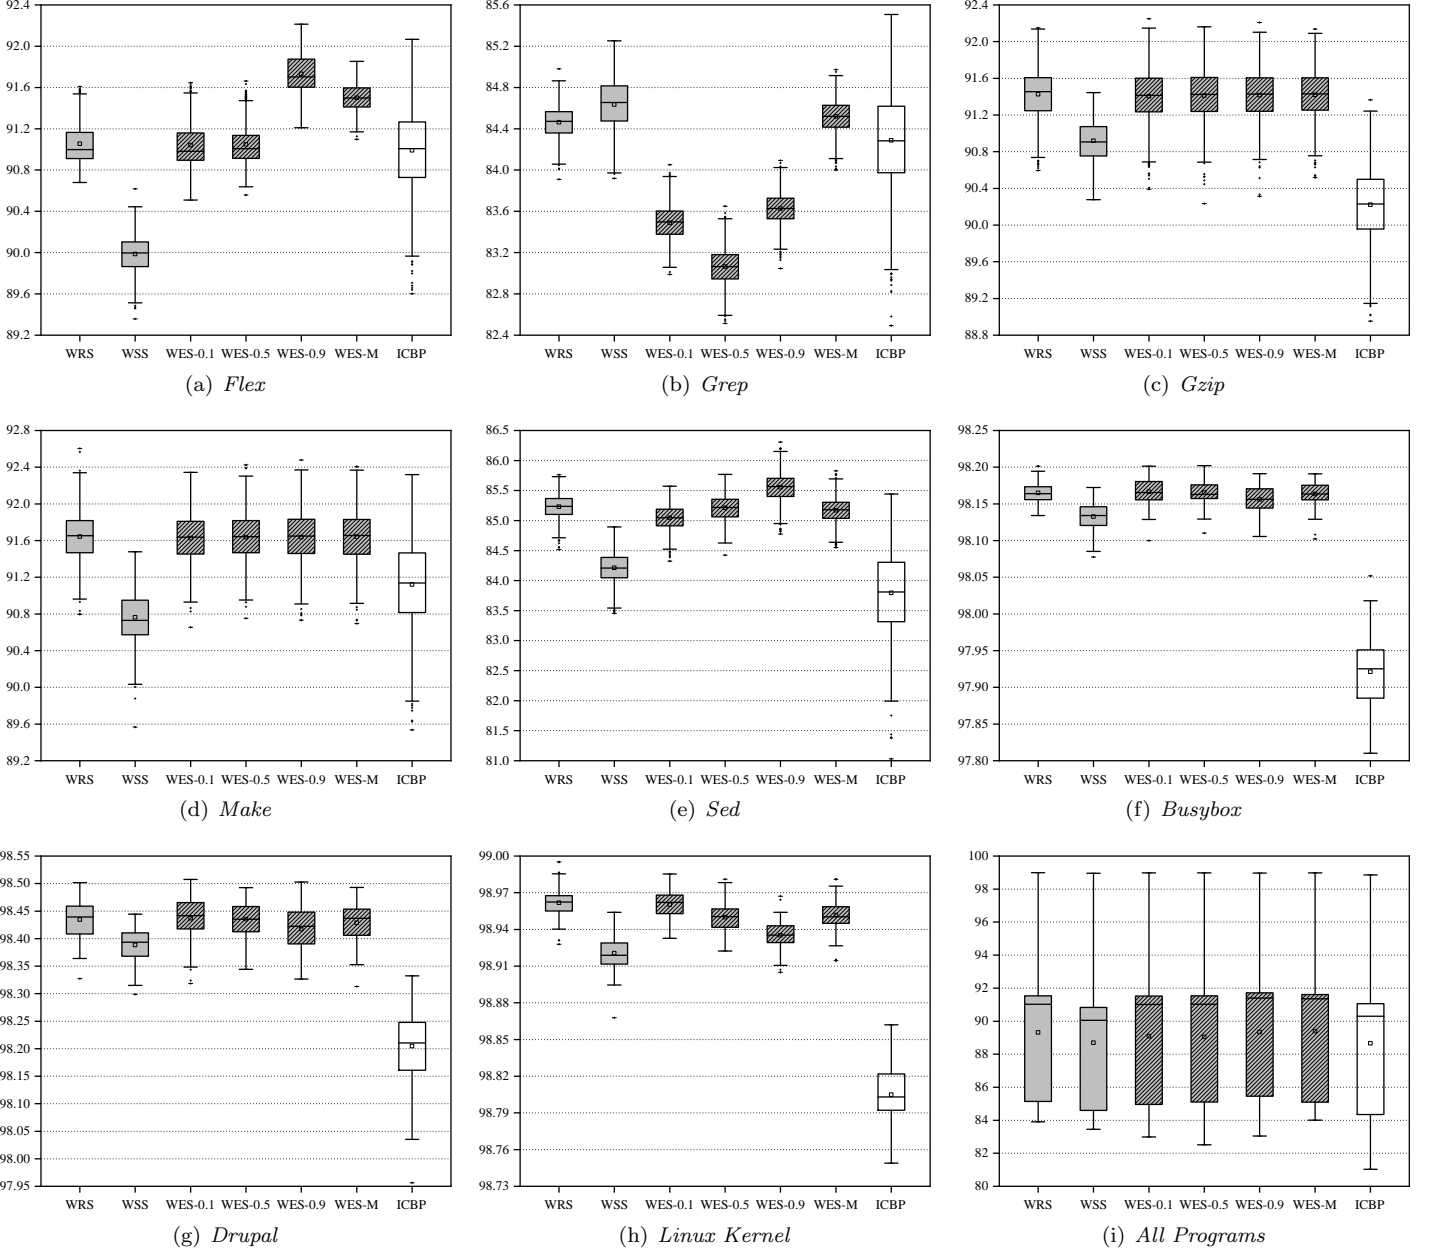

Figure 1: AvgAPCC comparisons for prioritization strength $\tau = 1$.
